# About Us

We are a family run business based locally in Northern Ireland. We have been specialising in high end professional quality and realistic artificial plants, trees, grass, privacy screening and gardenware for over 15 years. Our artificial plants and trees are ideal for lounges, offices, studies, conservatories and they even make a great gift idea. You'll never need to cut your artificial lawn and it will look lush and tidy all year round. The advantage of artificial plants and trees is that they require no maintenance. You don't need to water or trim them, and they never die. What could be simpler? And when they look this good, who needs real plants anyway?
